## PR-DOBERMAN
## Indoor/Outdoor Siren & Strobe

### PR-DOBERMAN
### Indoor/Outdoor Siren & Strobe

The PR-DOBERMAN Indoor/Outdoor Siren & Strobe is a high-performance visual and audible notification device designed for healthcare, security, and life-safety applications. Featuring a powerful siren and integrated blue strobe light, this rugged unit provides immediate emergency notification in environments where rapid staff awareness is critical. Its weather-resistant polycarbonate construction makes it suitable for both indoor and outdoor installations.

### Specifications

- **Sound Output:** 105 dB at 12 VDC
- **Alarm Type:** Single-tone piezo warble siren
- **Light Output:** Integrated blue flashing strobe
- **Operating Voltage:** 6–14 VDC
- **Current Draw:** 180 mA (siren and strobe), 90 mA (strobe only)
- **Dimensions:** 2.9" × 4.8" × 1.7"
- **Housing Material:** UV-resistant polycarbonate plastic
- **Compliance:** CE Approved

### Common Applications

- Wander management systems at secured exits and entry points.
- Nurse call systems requiring localized emergency notification.
- Code Blue and emergency response alerting applications.
- Panic button and personal security alarm systems.
- Healthcare facilities, nursing homes, memory care centers, and assisted living communities.
- Maintenance rooms, laundry facilities, warehouses, and other industrial healthcare support areas.

### Features

- Combined audible and visual alerting improves emergency awareness.
- Independent siren and strobe operation provides installation flexibility.
- Weather-resistant housing supports indoor and outdoor deployments.
- Impact-resistant construction helps withstand demanding environments.
- UV-resistant materials maintain appearance and durability over time.
- Simple mounting options support installation on electrical boxes or wall surfaces.
- High-output alarm assists in notification within noisy or high-traffic areas.

### Functionality

- Provides audible and visual emergency notification during alarm events.
- Activates when triggered by nurse call systems, wander management systems, security systems, or local controllers.
- Generates a high-intensity warning tone and flashing blue strobe to attract attention.
- Supports rapid staff response to emergency situations and security incidents.
- Can operate the siren and strobe independently or simultaneously depending on system configuration.
