Q-Pumps

MIXER SERIES

THE WORLD'S MOST ECONOMIC AND EFFICIENT MIXERS

HIGH QUALITY

Perfectly created for applications that require to be homogenized or disintegrated while being pumped. The most versatile mixers in the market.

Designed under 3-A and EHEDG standards.

QIM
INLINE MIXER

The most versatile mixer in the market due to it's 5 different backplate options tailor-made designed for each application. Designed for easy cleaning.

QDB
DRY BLENDER

YOUR PROCESSES, EASIER

The QDB has a modular design that consists of a QIM inliner mixer coupled with a work table and a cone. It also includes an integrated valve for improved ergonomy.

QVM
VISCOSITY MIXER

HIGH VISCOSITY MIXER

The QVM mixer is a QDB Dry blender integrated with a twin screw QTS Pump which improves the performance of the pump allowing higher viscosities.

Q-Pumps

THE BEST PUMPING SOLUTIONS FOR YOUR SANITARY APPLICATIONS

QTS SERIES

TWIN SCREW PUMPS FOR INFINITE APPLICATIONS

The QTS is a twin screw pump, 100% sanitary and ideal as a process pump and CIP, which reduces costs and maintenance times.

QC SERIES

EASY ASSEMBLY CENTRIFUGAL PUMPS

The QC + series is ideal for sanitary and non-sanitary applications, perfect for the food, beverage and agrochemical industries.

QIS SERIES

INTERNAL SEAL

The QIS is a new sanitary centrifugal pump with an Internal seal, ideal for sanitary and non-sanitary applications, perfect for the food, beverage and pharmaceutical industries.

QDU SERIES

THE FASTEST DRUM UNLOADER WITH THE LESS ENERGY CONSUMPTION

The QDU is a Drum Pump Unloader equipment, fully designed with an integrated QTS Pump linked to an electric motor, which allows savings in energy consumption 5 times less than the competitors.
