Product Specification Sheet
WNC-1PB
Push Button Station

WNC-1PB Push Button Station

The WNC-1PB Push Button Station is designed for applications needing push-on and push-off alarm functionality. Activating the station transmits alert data directly to the Video Display Console. When configured within the system as a bed station, pressing the button also triggers any connected corridor lamps or zone indicators.

Specifications

- **Dimensions:**
  Height: 4-1/2" (114mm)
  Width: 2-13/16" (72mm)
  Depth: 1-5/8" (41mm)
- **Panel:** Flame-retardant GE Lexan faceplate (UL flame rating 94V-0)
- **Batteries:** One CR123
- **Backbox:** Carlon B120A plastic single-gang box
- **Flush Mount:** Cooper BB10L single-gang B-Line bracket
- **Surface Mount:** Wiremold 2348 plastic single-gang box (1.75" deep)

Architects and Engineers Specification

The flush-mounted unit shall be a WNC-1PB or equal, featuring push-on / push-off activation that sends alarm data to the main Video Display Console. System resetting must occur at the original station using the push button. When programmed as a bedside unit, pressing the button must also illuminate corresponding hallway corridor and zone lights.

Features

- Straightforward push-on / push-off functionality
- Local call cancellation directly at the station
- Construction featuring a flame-retardant GE Lexan faceplate

System Components

PC: Video Display Console
MV500: Desk Console
WNC-DL: Control Unit / Power Supply
MV200 PLUS: Desk Console
