Product Specification Sheet
WNC-408-2
Sounder

WNC-408-2
Sounder

The WNC-408-2 is a wall mount unit featuring pulse tone lengths at a fixed high-pitch frequency. This sounder may be used in any location where louder audible alarm annunciation is desired. The WNC-408-2 Sounder connects to a powered relay on the Micro-Vision 200Z, 200Plus, 400Z or 500Z wireless console receiver.

Specifications

- **Dimensions:** Height: 3"
- **Width:** 3"
- **Depth:** 1.25"
- **Voltage:** 9 to 18 VDC
- **Wire:** May be installed up to 300 feet from console using 2 pair, 18 AWG wire

Architects' and Engineers' Specifications

The Console/Receiver shall have an optional sounder available for areas requesting louder alarm annunciation. The optional sounder shall provide a tone with three distinct lengths:

- Fast: 0.02 sec
- Medium: 0.25 sec
- Slow: 1 sec

It shall connect to the system on a powered relay at the rear of the console/receiver.

Equipment Options

- The ME20A-1203B01 serves as a unified power provider across various medical facility layouts and system configurations:
- System Integration: Built explicitly as an essential power foundation for the MV200Plus, MV500, and PC-Based wireless nurse call system architectures.
- Receiver Compatibility: Fits seamlessly into the rear power receptacles of MV 200Z and MV 400Z wireless console receivers.
- Interchangeable Prongs: Configured with fixed-blade North American prongs, with compatibility extending to global multi-blade terminal adapter kits for regional flexibility.

System Components

MV200: 200Z Console
MV200plus: 200Plus Console
MV400: 400Z Console
MV500: 500Z Console
