Product Specification Sheet
WNC-AIO
All-In-One- Touch Screen Console

WNC-AIO
All-In-One Computer Console

The WNC-AIO is an all-in-one touchscreen computer console for use at a emergency station or anywhere else annunciation is desired. It is connected to the server via the LAN using wifi or CAT5/6. It is programmed via the required PC series server to annunciate all calls for assistance or just calls from a specific area or building. The touchscreen can be used to obtain resident or staff location, to add notes pertaining to a call or event, to schedule reminders and a variety of other tasks. The console features low power relative to a full-sized PC with edge-to-edge monitor design which provides more screen in less space. It has the ability to adjust the display all the way flat and has an optional close wall-mount bracket available. Single pivot, 3-axis articulation, smooth adjustable screen angle with 360-degree rotation, 60-degree swivel and 15-degree tilt.

FEATURES

- Touch screen monitor and keyboard
- Edge to edge monitor design
- Announces stations and devices as programmed
- Optional wall mount bracket
